

Forest School

In Forest School this week we had the chance to plant our own tree on the school field! We loved playing in the muddy kitchen; making pies and serving them through the hatches. We had fun using a tarp to make a den. Also, we found enough sticks to make our own skeleton.

We had a festive time in Forest School this week. We used a tool called a palm drill to create and thread a Christmas star. We roasted marshmallows on a stick, making sure we were in a safe stance by the fire.

This week in Forest School we made bread and then roasted it on a fire. Some of us went back for seconds and thirds! We used a handmade sledge to pull other children around. Also, some of the children worked as a team to build a house out of logs in the forest.

We had a soggy time in Forest School this week. The rain didn't stop us though! As our topic is all about owls, we made our own nests by gathering sticks, leaves and pieces of hay- just like a bird would! We created Forest pictures using only natural things around us. We used tools such as secateurs to cut bits to size.

We warmed ourselves up with some hot chocolate to finish.

This week in Forest School we loved playing the mud and didn't mind one bit when we slipped over. We imagined we were in space with no gravity and tried to eat the apples that were floating. We used tools such as peelers and palm drills to transform sticks into wands, paint brushes and standing decorations.
